

Exploring Positron

Part of "Introduction to Positron" workshop

Posit Software, PBC

You should be here

Your turn

Positron Bingo!

10_m 00_s

- Your "bingo" card has things for you to **find**
 - **Data Explorer** cells: first run `View(mtcars)` in the Console
- Complete 5 in a line and call out "BINGO!"

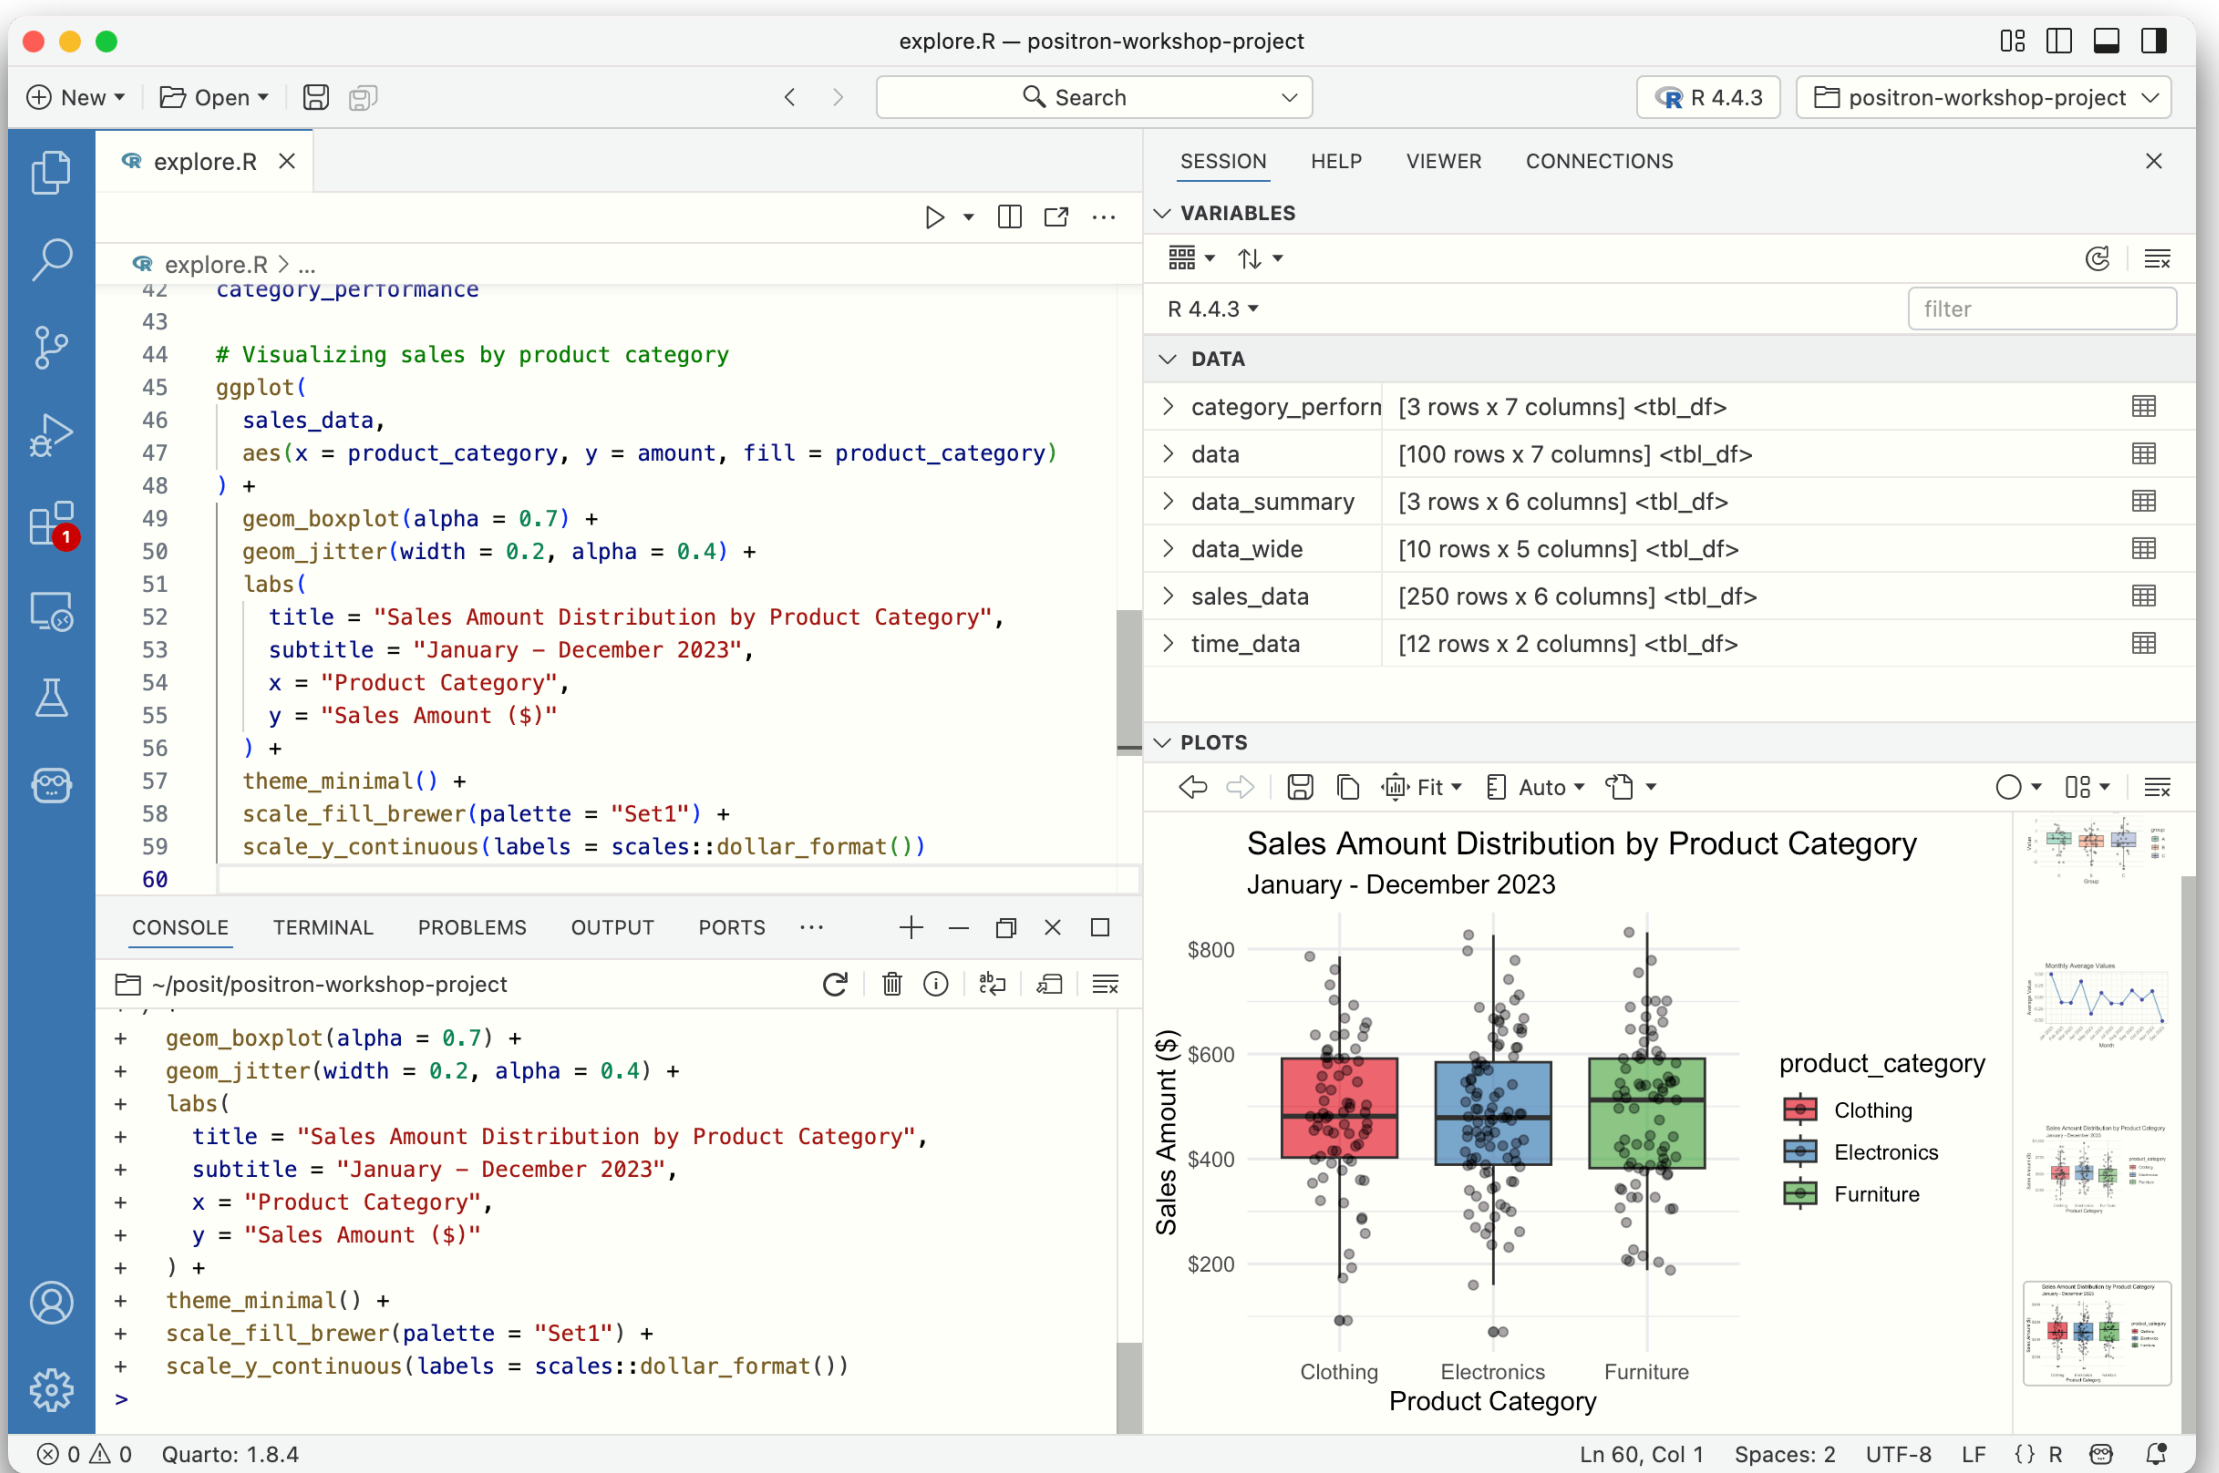

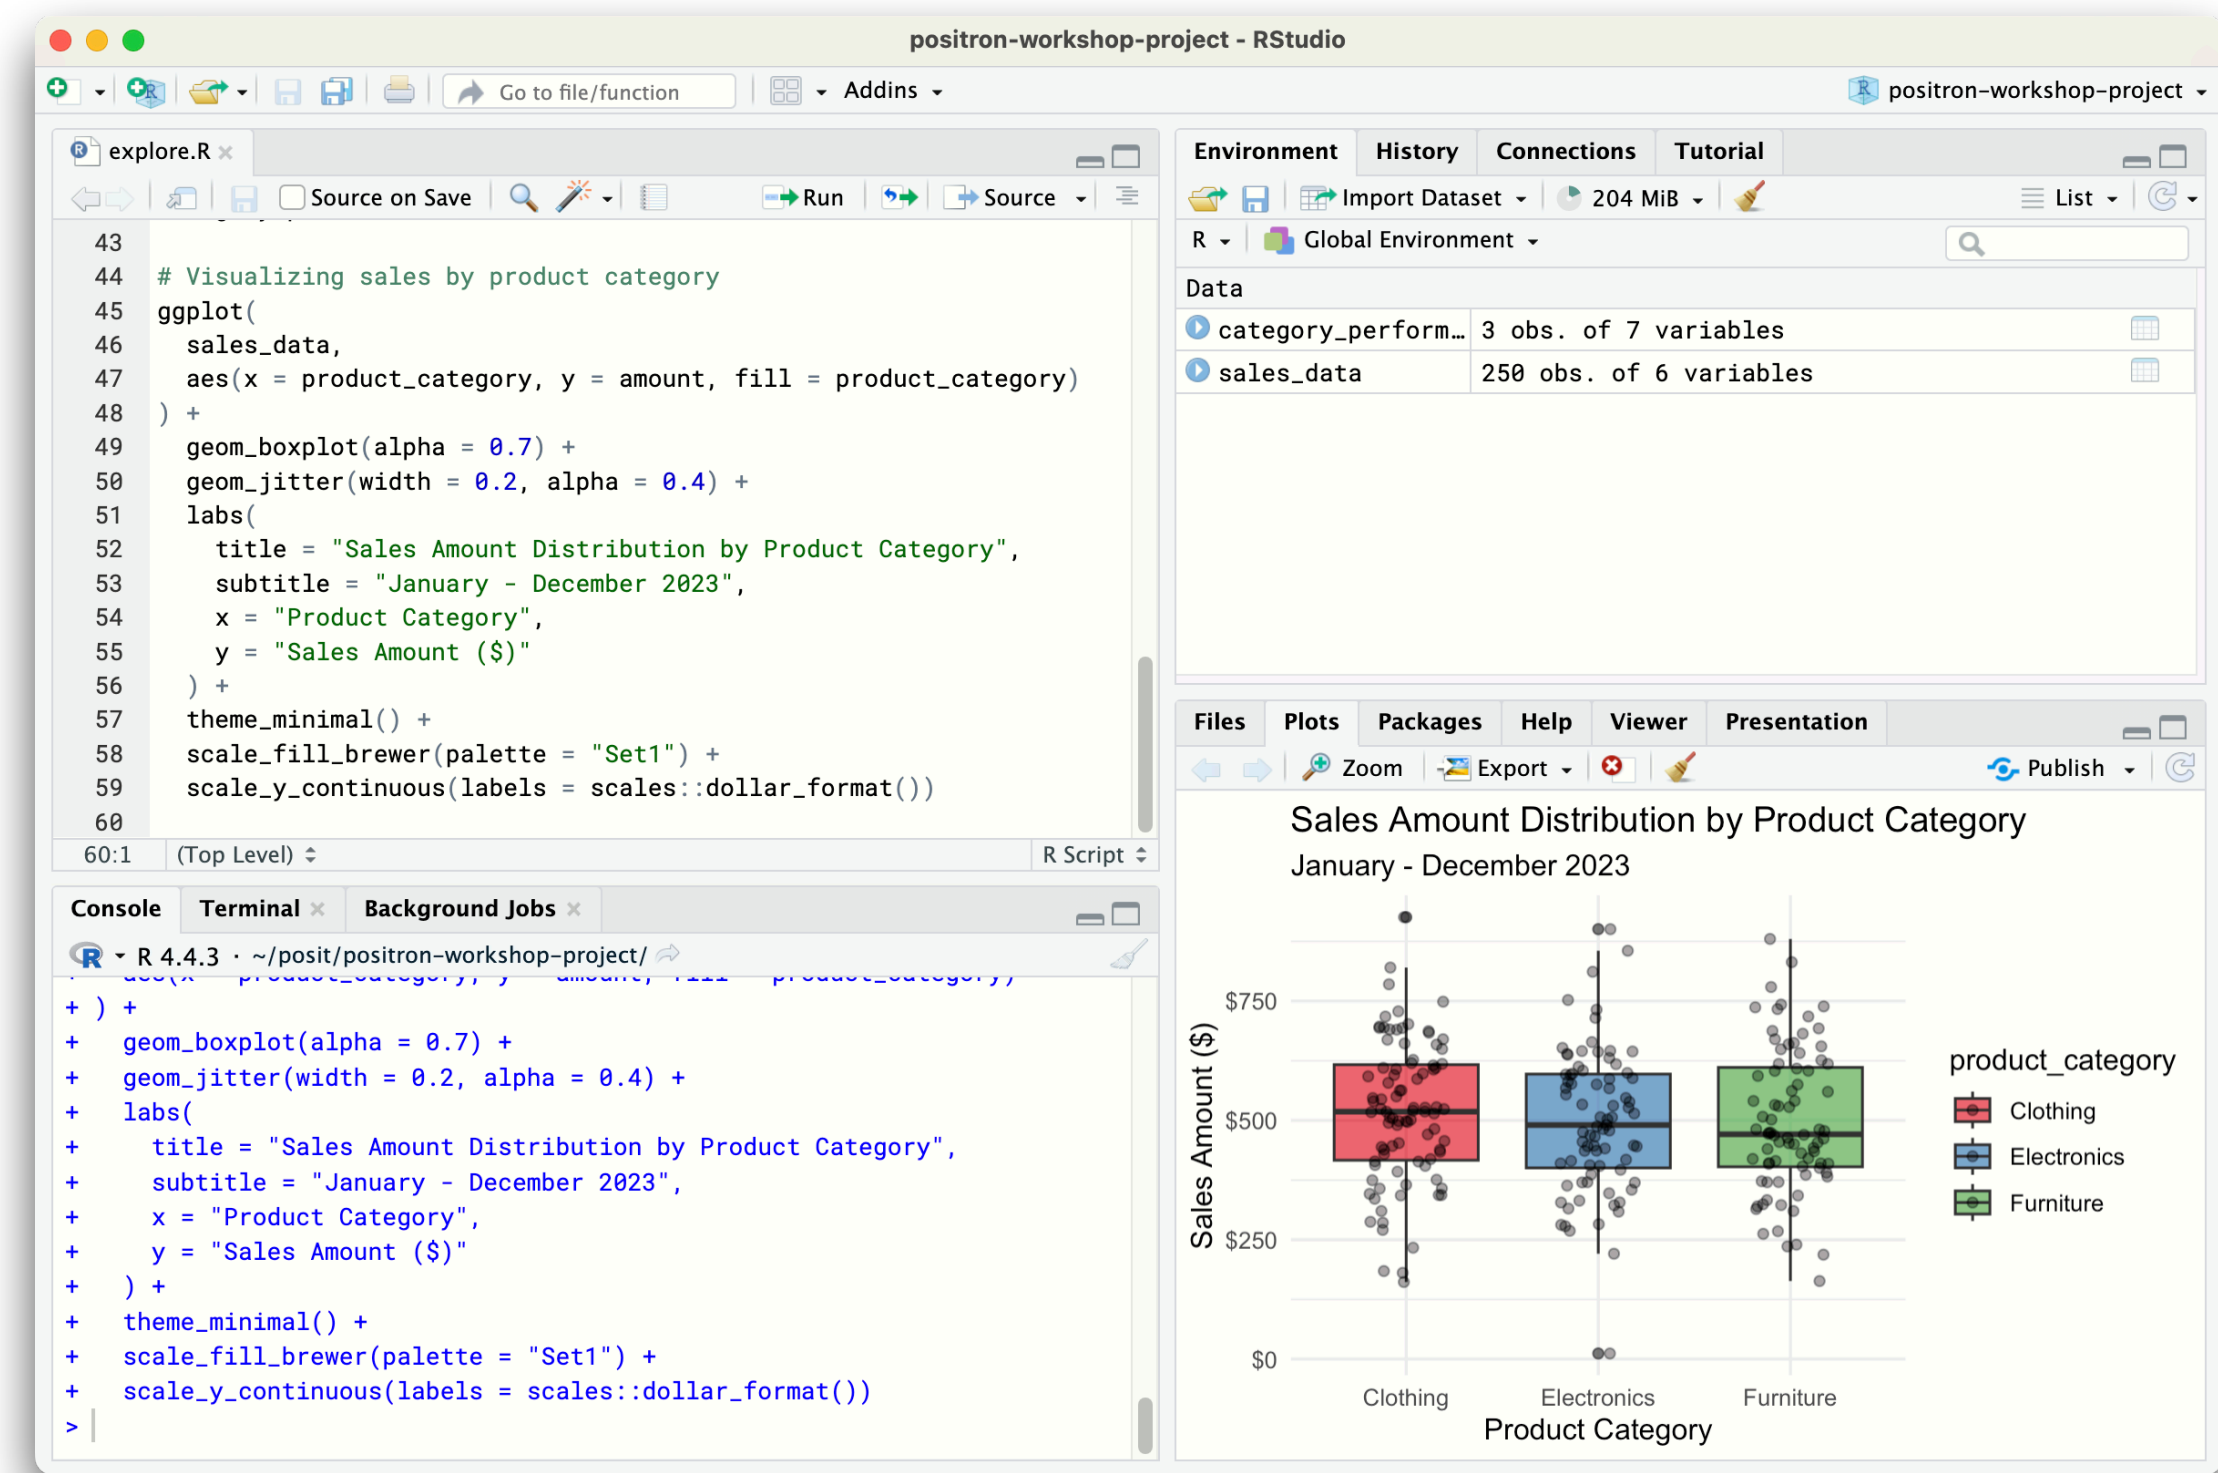

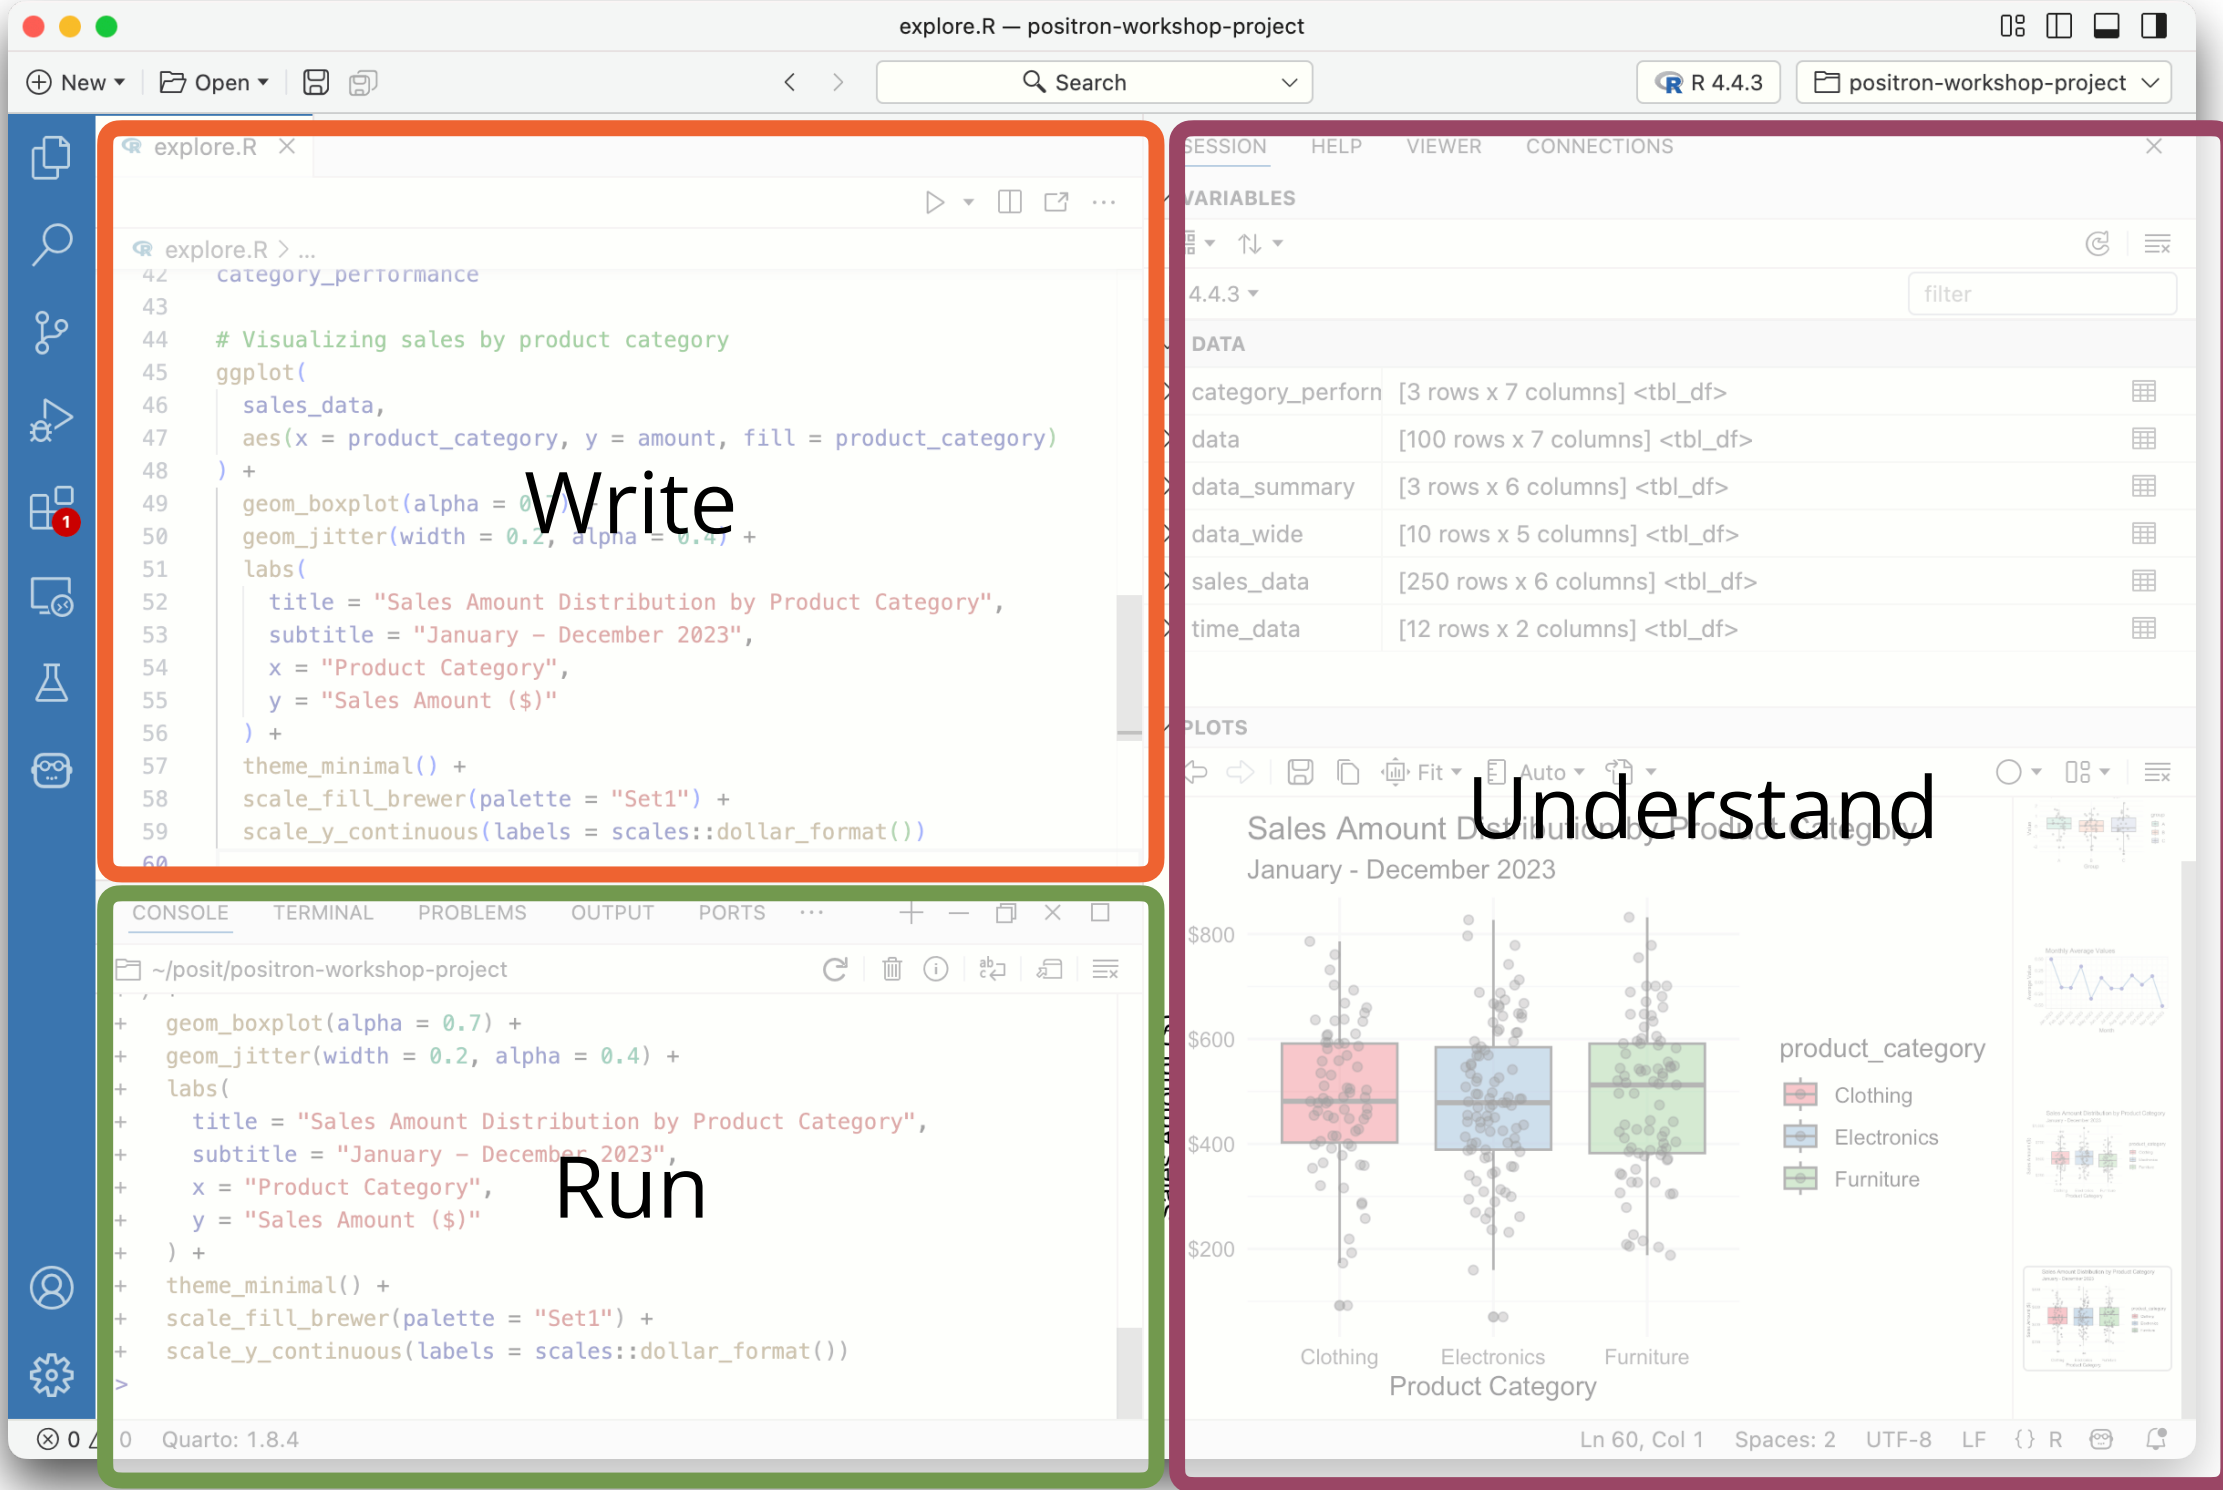

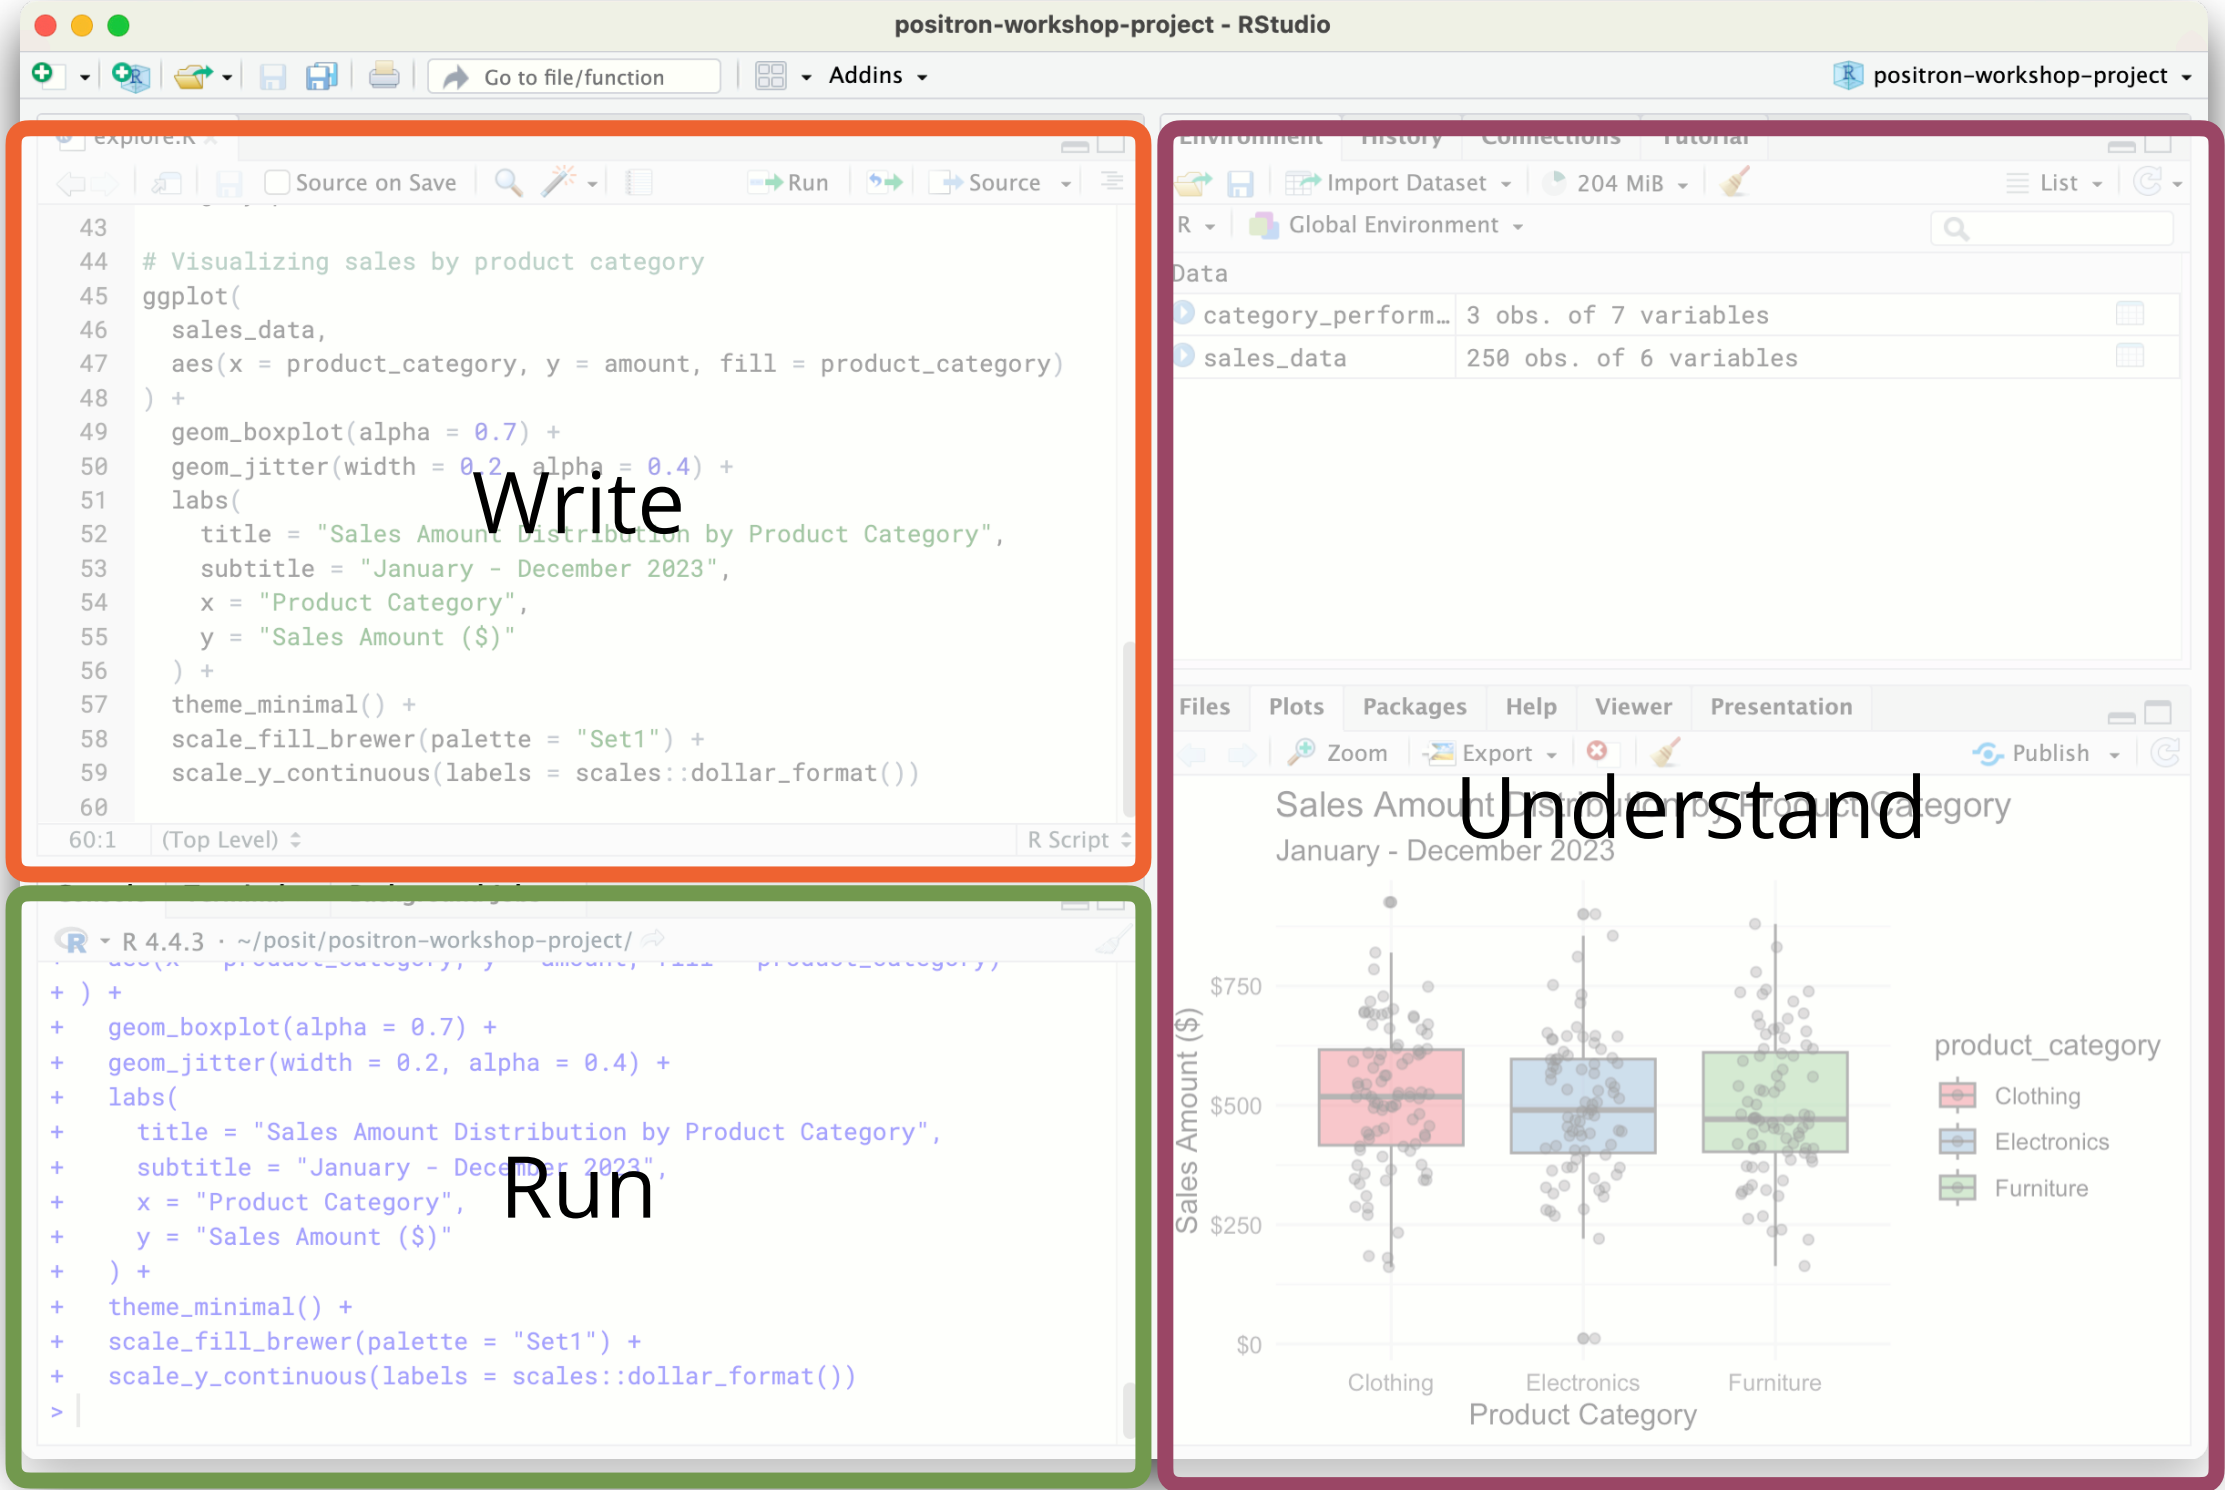

Your turn

Example Card

| | | | | |
|--|--|--|---|--|
| A way to see and edit two files side by side | The shortcut to send R code to the Console | Another way to open the Command Palette | A way to open a specific file by its name | Data Explorer: the number of cars where cyl is 4 |
| A terminal, i.e. "a shell" | The shortcut to insert "<--" | The button that opens your console history | The button that saves a plot | A way to open a new Positron window |
| How to change the IDE theme | The "Find and Replace" dialog box | FREE | An RStudio pane that isn't in Positron | How to change the IDE zoom level |
| Where Git information and actions live | The setting that enables RStudio shortcuts | The button to restart the R Console | A way to open a new R script file | A prompt to "Open a folder" |
| The version of R running in the Console | The current working directory of the Console | A way to start another Console | The version of Positron you're running | The shortcut for "Help: Show help at cursor" |

What's the same?

Use your RStudio muscle memory

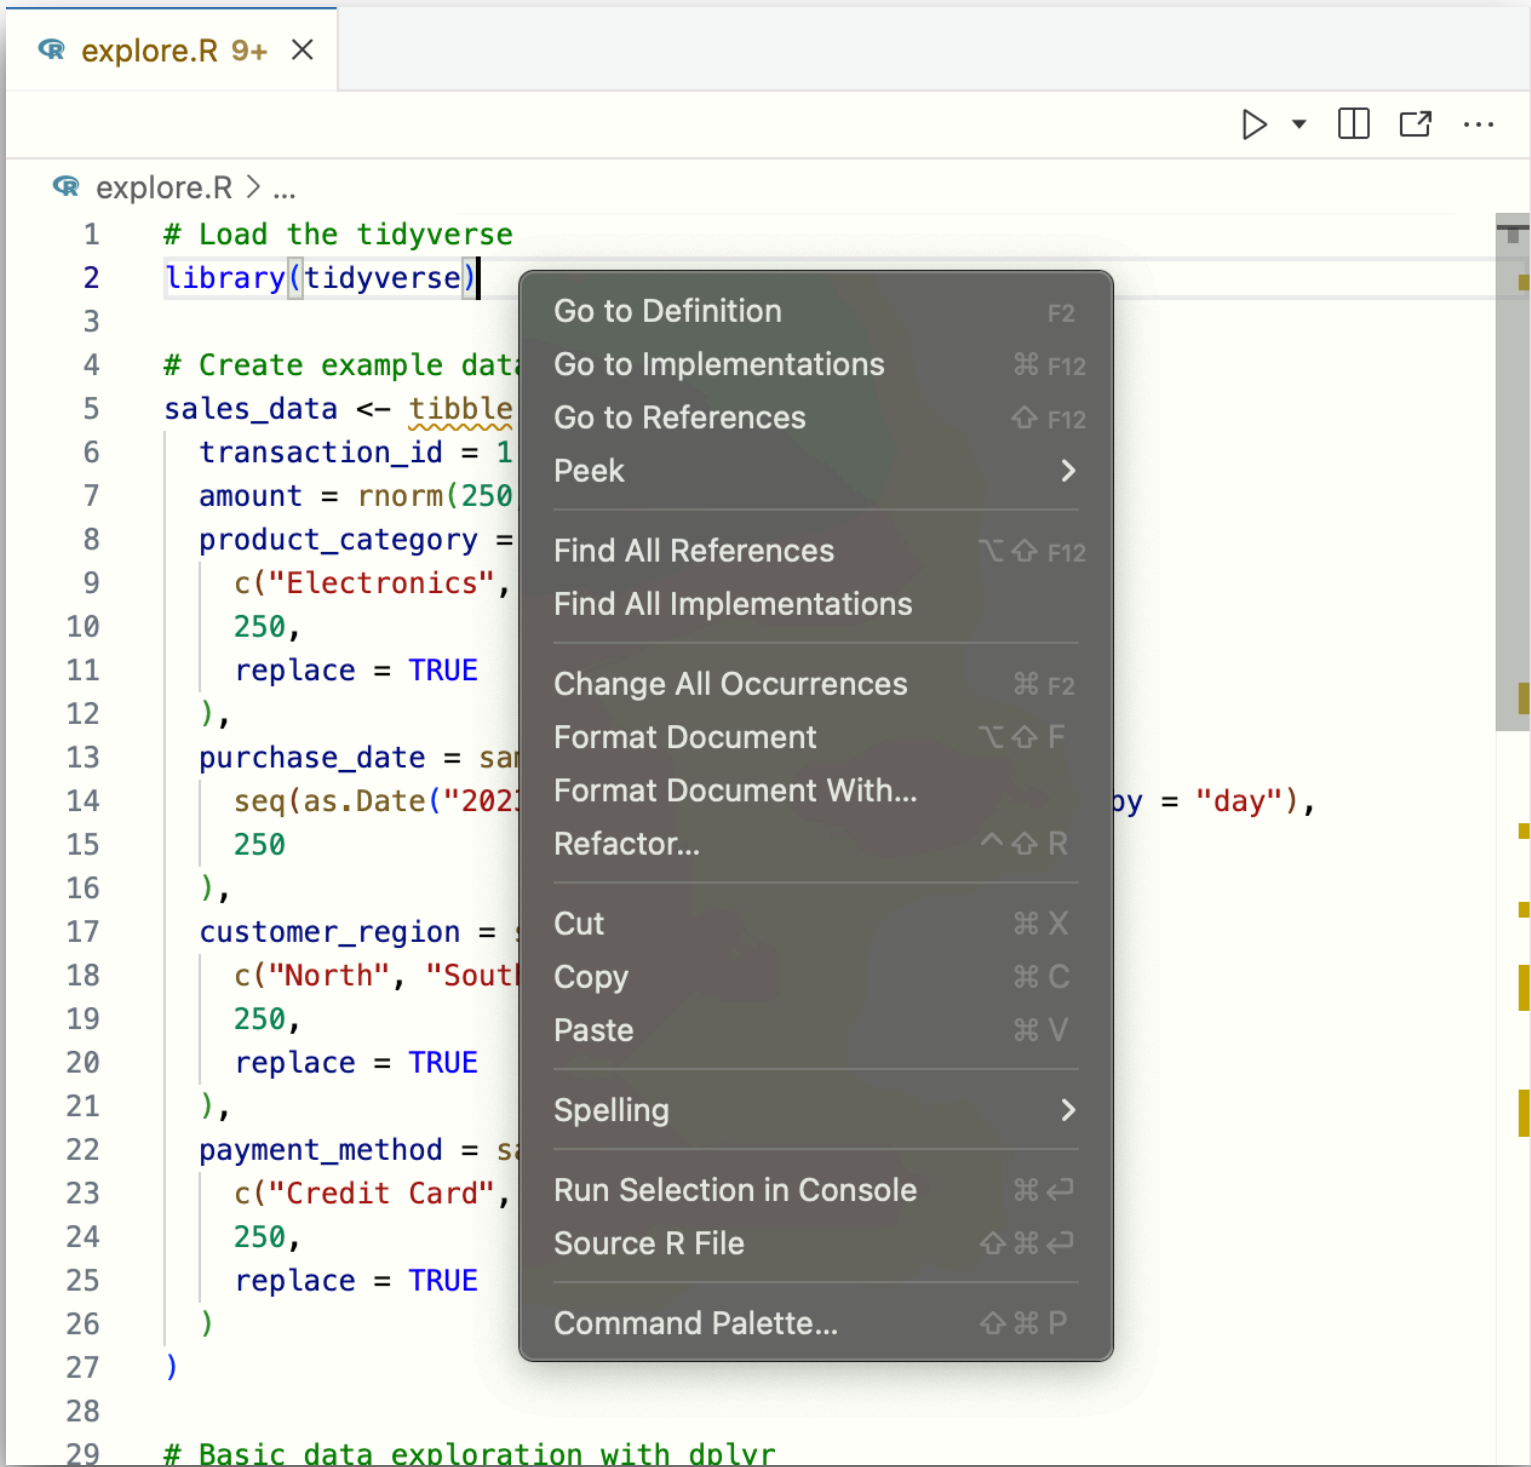

- New R File*: Cmd/Ctrl + Shift + N
- Send Code to Console: Cmd/Ctrl + Enter
- Get Help at Cursor: F1
- Find: Cmd/Ctrl + F
- Find in Files: Cmd/Ctrl + Shift + F
- Restart R: Cmd/Ctrl + Shift + 0
- Navigate Console History: Cmd/Ctrl + ↑
- Completion: Tab

*Enable Setting: RStudio Keybindings

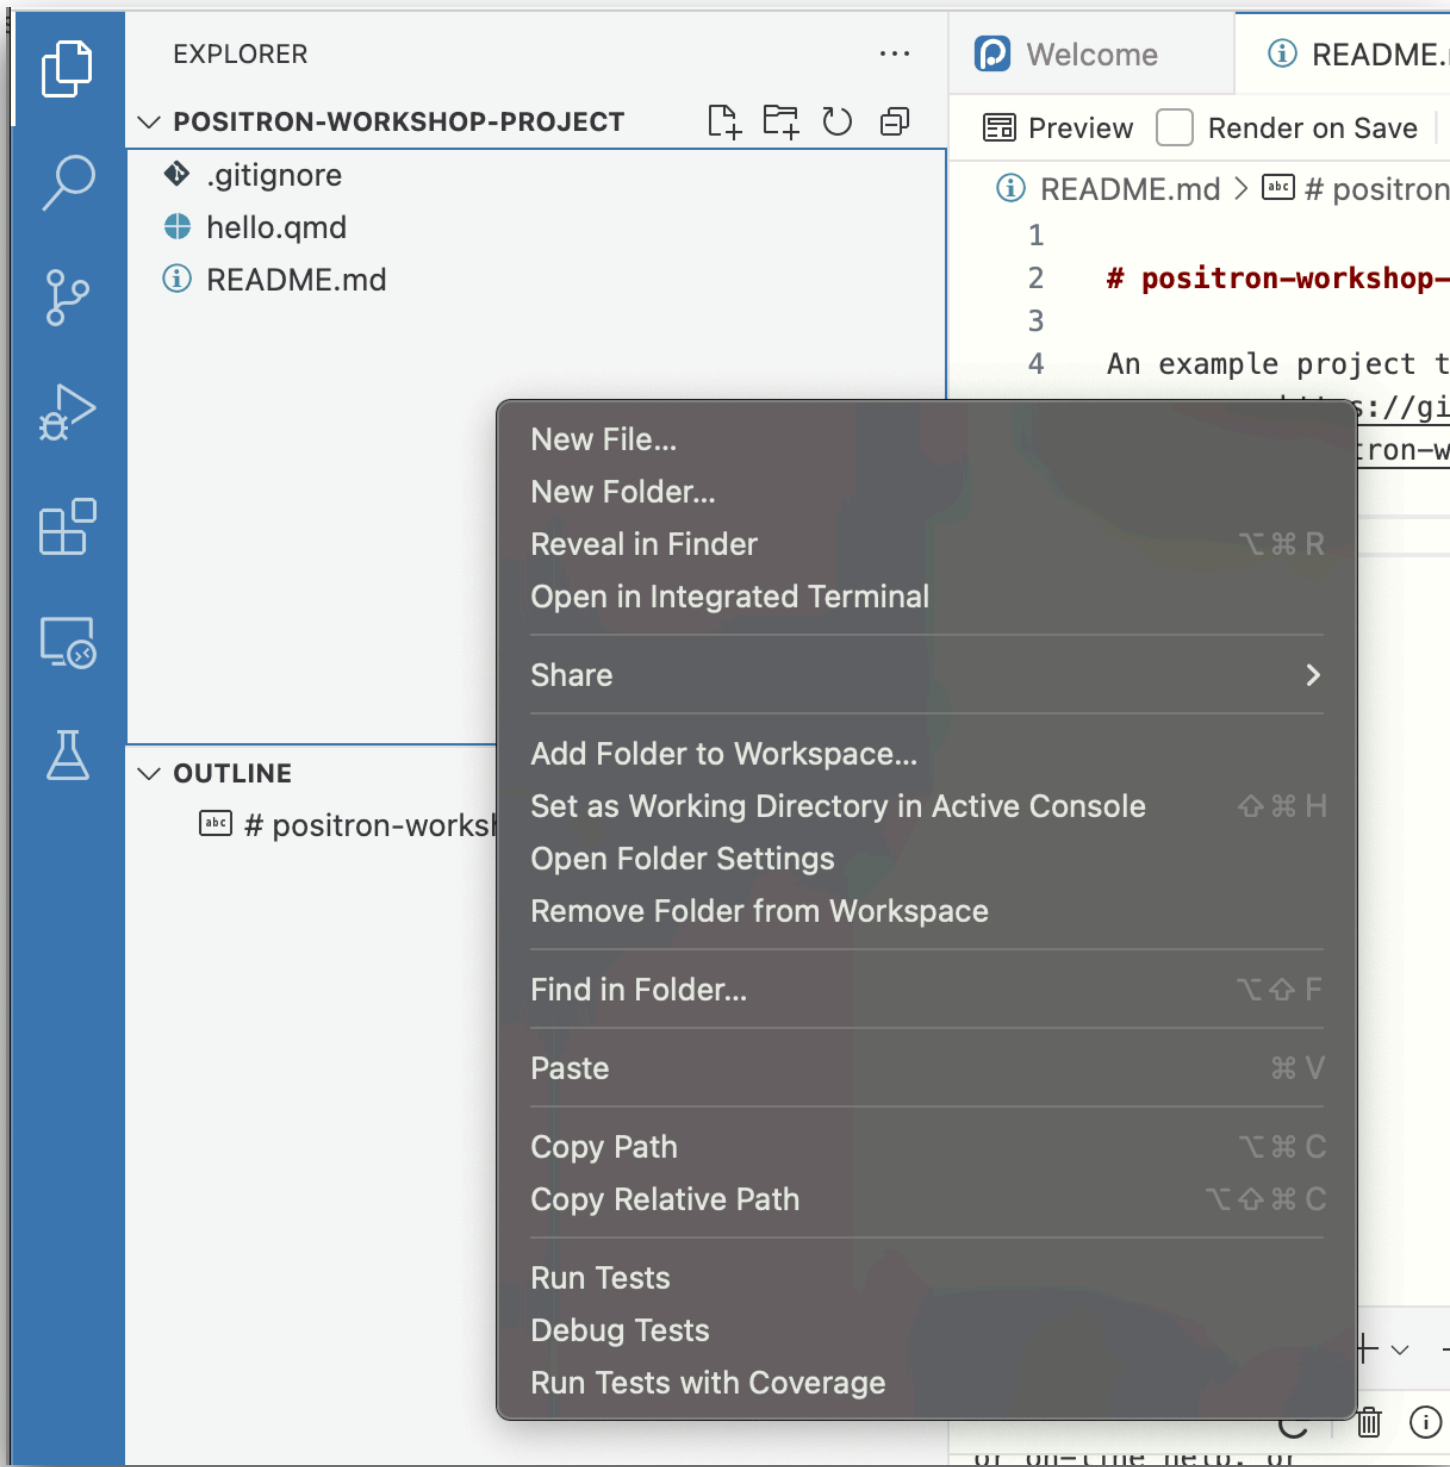

What's different?

Less menus, more right-click

Editor

(File) Explorer

Less clicks, more command palette

Almost everything in a menu or button has a command

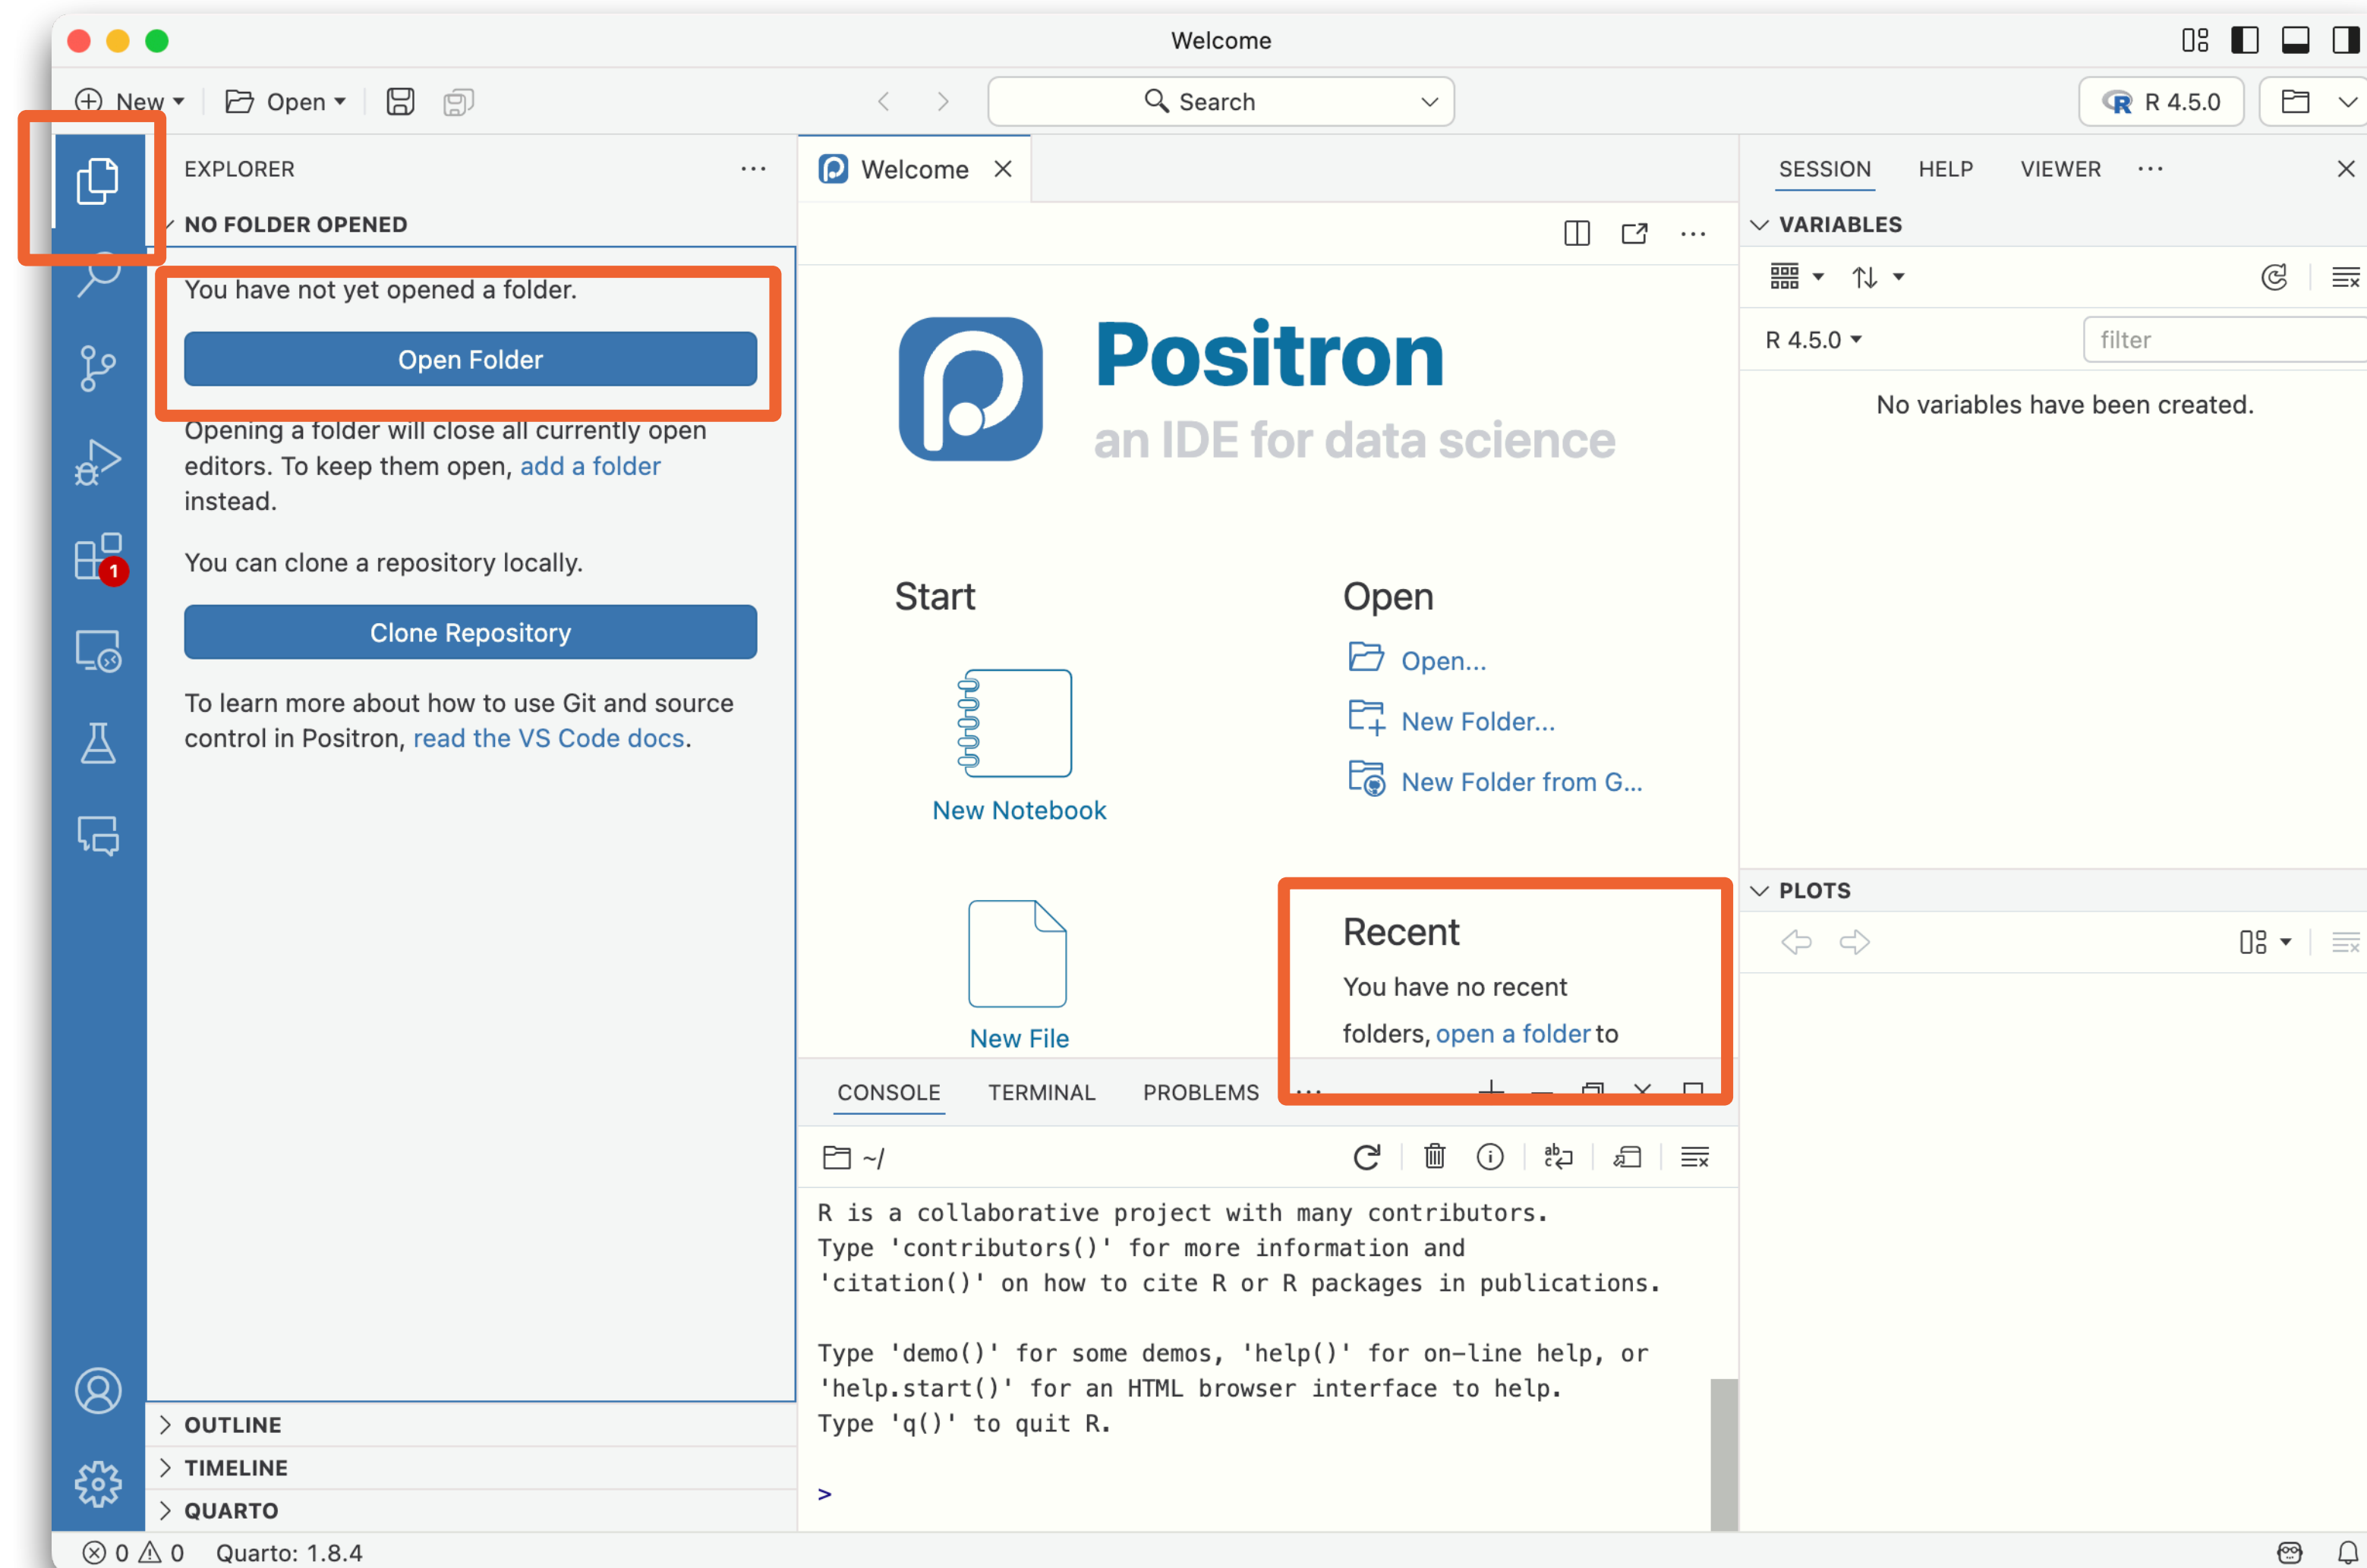

Menu: **File > New File > R File**

Command: **R: New R File**

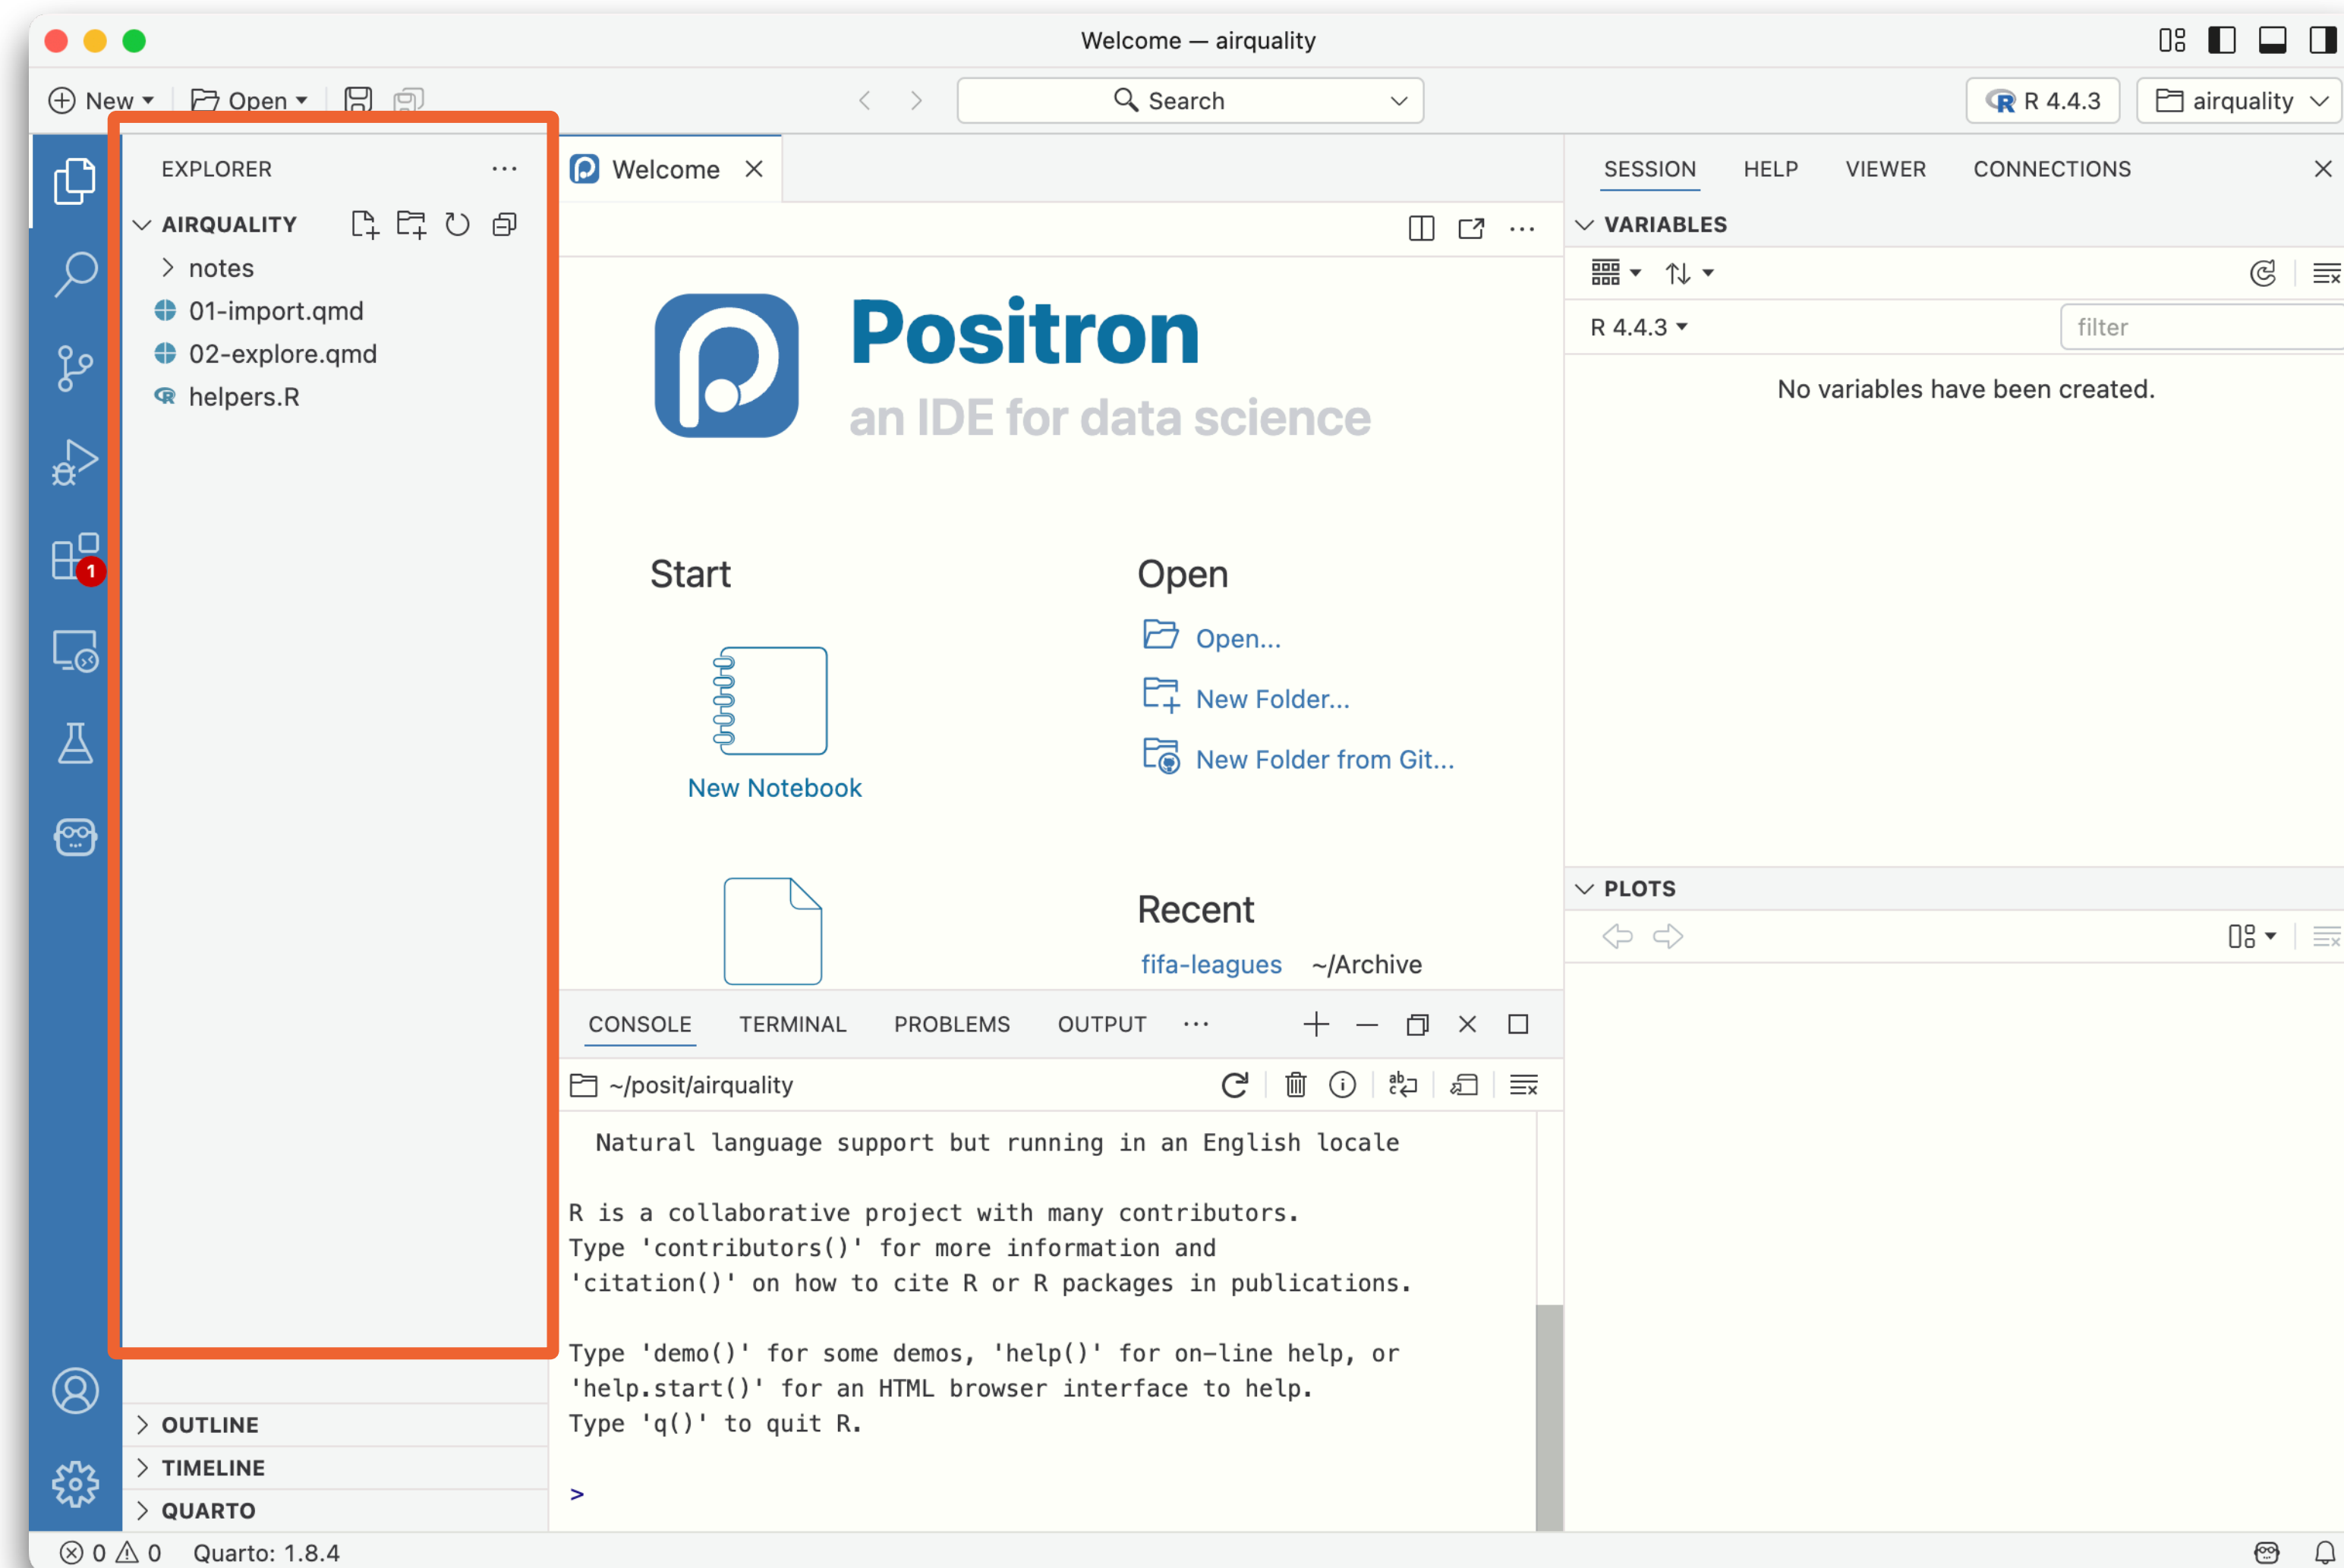

Any command can be given a shortcut

Positron really wants you to open a folder

(File) Explorer comes to life when you do

More later...
